

**ADTA 5940 Module 3 First Draft Grading Rubric**

<b>Grading Criteria</b>	<b>Analysis Components</b>	<b>Points</b>	<b>Score</b>
Organization of paper	Paper is presented in organized manner (introduction, literature/industry review, methods section, results section, interpretations, discussion/summary/limitations)	25	
Presentation of research project (intro, lit/industry review, methodology sections)	Introduction clearly describes research project and overall importance of the project. Literature/industry review documents past and current research/best practices related to your project in a way that helps to set the foundation for the project. Methods section describes how data was collected, variables, analysis techniques and tools, data preparation, etc.	60	
Research Question or Hypothesis Statement and results/ interpretation	Clear and concise presentation of research questions or hypotheses statements related to your data. Your research questions were critical to your literature/industry review. Without meaning questions, your section related to prior and current research will not connect with your analysis and interpretation of the results. Points for this question are include your analysis, interpretation of results and recommendation.	70	
Spelling, Grammar, and Format	No spelling &/or grammar mistakes. Document formatted per instructions with 12 point font, 1-inch margins, double spaced, name in header.	20
